Product Description

Manufacturer Supply High Quality Paricalcitol CAS 131918-61-1 With Safe Delivery

Paricalcitol is a synthetic vitamin D₂, namely a novel 1-α-hydroxy-19-noranalogue in which the ring A exocyclic methylene

group, typical of all vitamin D systems, has been replaced by two hydrogen atoms. Paricalcitol is the first vitamin D analogue marketed for this indication. In patients with chronic renal failure, Paricalcitol appreciably reduced levels of parathyroid hormone (PTH) without a significant difference in the incidence rate for hypercalcemia or hyperphosphatemia when compared with placebo.
