Product Description

Pinealon CAS 175175-23-2

What Is Pinealon?

Pinealon is a short synthetic peptide composed of three amino acids Glu-Asp-Arg, also called the EDR peptide (2).

Pinealon is known to impact the central nervous system leading to behavior modification, while also protecting the neurons and various other cell types from oxidative stress.

The main advantage of this peptide is that it has the ability to penetrate through the blood-brain barrier, cellular membrane, as well as nuclear membrane. This is one of the reasons why it is able to interact directly with the DNA molecules.

Product Benefits:

- Anti-aging effects
- Potential therapeutic agent to treat depression
- Potential therapeutic agent to treat brain disorders including:
 - Alzheimer's disease
 - Parkinson's disease
 - Memory enhancement
- Reduces fatigue
- Improves ability to concentrate
- This leads to behavioral modification
