Product Description

China manufacturer Supply 99% CAS 204656-20-2 Weight Loss Liraglutide

summarize

Liraglutide is a clear, colorless solution. The dosage form is subcutaneous injection. After more than 10 years of research and development, Liraglutide has many effects such as promoting islet cell regeneration, lowering blood sugar, reducing weight and protecting the cardiovascular system. The brand name Victoza is used to treat type 2 diabetes, and the brand name Saxenda is used to treat chronic obesity as a supplement for diet control and physical exercise. Liraglutide is an acylated human glucagon-like peptide-1 (GLP-1) receptor agonist, which has 97% amino acid sequence homology with human endogenous GLChemicalbookP-1 (7-37), retains all the biological activity of GLP-1, and has GLP-1 receptor agonist effect. The molecular structure of GLP-1 differs from that of natural GLP-1 by only one amino acid, and GLP-1 is modified in two parts: lysine 34th is replaced by arginine, and a glutamate-mediated 16-carbon palmitoyl fatty acid side chain is added to lysine 26th.
