Product Description

Anti-Aging Chemicals CAS 23111-00-4 Nr-CI Nicotinamide riboside chloride

Intro

Nicotinamide riboside is a precursor of nicotinamide adenine dinucleotide (NAD) and represents a source of vitamin B3. Recent studies have shown that ingesting larger amounts of niacinamide ribosides than those naturally found in food can provide new health benefits.

use

Nicotinamide riboside has been implicated in increasing tissue NAD concentration and inducing insulin sensitivity as well as enhancing deacetylase (sirtuin) function. Its ability to increase NAD production suggests that niacinamide riboside can also improve mitochondrial health, stimulate mitochondrial function, and induce new mitochondrial production. Other studies using nicotinamide riboside in Alzheimer's disease models have shown that the molecule is bioavailable for the brain and may provide neuroprotective effects by stimulating brain NAD synthesis.

Product Name	Nicotinamide riboside chloride
Purity	≥99%
